STEPHEN HUMBURG

Principal Software Engineer

I spent over 30 years honing my skills building scalable, reliable, and relatable PC and web solutions across healthcare, gaming, automotive, pharmaceutical, governmental, military, and energy sectors. I am currently pioneering AI tool and agent integration in IEEE-regulated environments. I also work with clients and internal teams on improvement to their software delivery process.

SKILLS & ABILITIES

Languages	C#, JavaScript, HTML, CSS, PowerShell, Java, Python, Perl
Frameworks	.NET, Angular, React, MVC, Razor, WPF
Cloud & IaC	AWS, Azure, Terraform, ARM/Bicep
Data	SQL Server, Oracle, PostgreSQL, Power BI, ETL
Practices	Agile/Scrum, CI/CD, Microservices, TDD
Specs	GDPR, HL7, PCI
Tools	Azure DevOps, Git, CLIs (dotnet, aws, az)

EXPERIENCE

03/2024 to Present – **Doosan GridTech** – Principal Software Engineer

- Pioneered incorporating AI tools & agents into an environment heavily resistant to change.
- Led migration of monolith to microservice architecture.
- Refactored primary software product (10M+ lines of code) to bring it into .NET SDK long term support.
- Established and facilitated a recurring cross-functional developer sync to foster connection between fully remote staff.
- Mentored other team's leads on integrating Agile/Scrum processes.
- Modernized legacy MS-DOS developer CLI to match modern conventions.

05/2022 to 12/2023 – **Accenture** – Team Lead Software Engineer

- Specialized in hybrid cloud solutions.
- Deployed client Azure infrastructure using Bicep.
- Assessed and improved software delivery processes.
- Led fellow developers through mentorship and brown bag presentations.

07/2018 to 03/2022 – **Cox Automotive** – Lead Developer

- Integral in bringing iRecon from proof of concept to a market-ready product in the automotive reconditioning space.
- Proposed using machine learning to replace complex purchase suggestion logic.
- Used Terraform to deploy and maintain AWS infrastructure.
- Designed time tracking system to aggregate start/stop of different tasks for process improvement analysis.

11/2015 to 07/2018 – **Blizzard Entertainment** – Senior Software Engineer

- Supported customer service facing applications spanning finance, subscriptions, and all game titles for a global player base.
- Developed APIs which were deployed to six global regions.
- Contributed to GDPR compliance initiative, updating data handling and storage across customer service systems.

04/2012 to 11/2015 – **Acryness Inc.** – Lead Developer

- Led developer team to redesign entire SaaS delivery pipeline, infrastructure, web application, and credit/eCheck payment process.
- Converted the payment processing system from a 3rd party credit card processor to an in-house ACH. This reduced transaction costs and eliminated dependency on the processor.
- Redesigned deployment process from a multi-hour roll forward process to a blue-green model. This created a zero-downtime environment and eliminated planned maintenance windows.
- Implemented several HL7 interfaces to import client data.

11/2010 to 04/2012 – **Hatteras Search Group** – Senior Web Application Developer

- Designed and delivered training sessions on TDD.
- Led development of a unit testing framework establishing testing strategies and code quality enforcement.
- Designed and developed the Mecklenburg County Sheriff's Office's Arrest Processing System.
- Designed and delivered database schemas supporting core application data models.

03/2009 to 11/2010 – **iContact** – Front End Engineer

- Stood up and led the Templates Team -- the organization's highest priority -- coordinating across employees and contractors (in-house and nearshore).
- Developed CSR-facing tooling, for accounts and billing, improving support team access to customer data.
- Contributed to a custom Salesforce Integration with iContact's API, extending support of client's marketing campaigns.

10/2005 to 02/2009 – **CC Intelligent Solutions** – Senior Software Developer

- Delivered software engineering across engagements for two clients and an internal team.
- Modernized a legacy VB6 application to VB.Net for the NC Secretary of State, Charitable Solicitation License Division.
- Rewrote the security class library used by all web-based applications for the NC Division of Information Resource Management (DIRM).
- Supported and enhanced a document storage system used by 12 state divisions.
- Converted four production applications from Visual Studio 6 to Visual Studio .NET.
- Converted an application from Apache/Perl to MS IIS/C#.
- Contributed to a military project using SharePoint, WCF, Web Parts, and Workflows.
- Developed a multi-server SharePoint workflow proof of concept.

07/1999 to 10/2005 – **Keane Inc.** – Senior Application Developer

- Provided supplemental staffing for clients such as Glaxo Smith Kline, GE Capital Mortgage, and the State of North Carolina.
- Delivered two .NET projects, and three web-based document/content management systems.
- Led development teams for two client engagements.
- Specifically requested by a client to return for a second assignment.
- Increased speed of client's nightly batch application by 500%.
- Received client award for 65% reduction in subscription requests exceeding one-day processing time.

08/1998 to 07/1999 – **CareerShop.com** – Web Application Developer

- Maintained and enhanced the company's resume and job posting platform.
- Developed a web-based document flow system to enhance the client's hiring process.
- Administered core server infrastructure: IIS, SQL Server, MS Index Server, and MS Transaction Server.

08/1996 to 08/1998 – **Orange County Government** – Web Programmer

- Developed an inmate search application serving the bail bond industry.
- Developed two web applications providing database access for county operations.
- Maintained the county's web site pages, images, and navigation.

04/1994 to 03/1996 – **Lockheed Martin** – Program Analyst

- Held secret-level security clearance granted by the US government.
- Developed test software to validate Jovial J73 code produced by certified engineers.
- Developed an HTML web site to provide information about team projects.

EDUCATION

August 1998 – **University of Central Florida** – Bachelor of Science, Computer Science
