STEPHEN HUMBURG

Principal Software Engineer

I spent over 30 years honing my skills building scalable, reliable, and relatable PC and web solutions across healthcare, gaming, automotive, pharmaceutical, governmental, military, and energy sectors. I am currently pioneering AI tool and agent integration in IEEE-regulated environments. I also work with clients and internal teams on improvement to their software delivery process.

SKILLS & ABILITIES

Languages	C#, JavaScript, HTML, CSS, PowerShell, Java, Python, Perl
Frameworks	.NET, Angular, React, MVC, Razor, WPF
Cloud & IaC	AWS, Azure, Terraform, ARM/Bicep
Data	SQL Server, Oracle, PostgreSQL, Power BI, ETL
Practices	Agile/Scrum, CI/CD, Microservices, TDD
Specs	GDPR, HL7, PCI
Tools	Azure DevOps, Git, CLIs (dotnet, aws, az)

EXPERIENCE

03/2024 to Present – **Doosan GridTech** – Principal Software Engineer

- Pioneered incorporating AI tools & agents into an environment heavily resistant to change.
- Led migration of monolith to microservice architecture.
- Refactored primary software product (10M+ lines of code) to bring it into .NET SDK long term support.
- Established and facilitated a recurring cross-functional developer sync to foster connection between fully remote staff.
- Mentored other team's leads on integrating Agile/Scrum processes.
- Modernized legacy MS-DOS developer CLI to match modern conventions.

05/2022 to 12/2023 – **Accenture** – Team Lead Software Engineer

- Specialized in hybrid cloud solutions.
- Deployed client Azure infrastructure using Bicep.
- Assessed and improved software delivery processes.
- Led fellow developers through mentorship and brown bag presentations.

07/2018 to 03/2022 – **Cox Automotive** – Lead Developer

- Integral in bringing iRecon from proof of concept to a market-ready product in the automotive reconditioning space.
- Proposed using machine learning to replace complex purchase suggestion logic.
- Used Terraform to deploy and maintain AWS infrastructure.
- Designed time tracking system to aggregate start/stop of different tasks for process improvement analysis.

11/2015 to 07/2018 – **Blizzard Entertainment** – Senior Software Engineer

- Supported customer service facing applications spanning finance, subscriptions, and all game titles for a global player base.
- Developed APIs which were deployed to six global regions.
- Contributed to GDPR compliance initiative, updating data handling and storage across customer service systems.

EARLIER CAREER

20+ years of progressive software development roles across government, healthcare and enterprise sectors including holding US government secret-level security clearance.

EDUCATION

August 1998 – **University of Central Florida** – Bachelor of Science, Computer Science
